- MVC architecture
- Data structure
- HTML,CSS,
- Javascript
- ejs
- figma
- Bootstrap

Language

English

Spanish

Experience

2023-present
Brototype ,Trivandrum

Intern

I'm currently interning at Brototype.I self in Trivandrum, and I've been working as a self-taught JavaScript developer. In this role, I've had the opportunity to develop problem-solving skills, effective communication abilities, and maintain a disciplined work ethic.
I'm particularly proud of a mini-project I recently completed, which is an e-commerce store named Ansa. This project showcases a range of features, including user management, admin management, cart functionality, checkout processes, and order management. I'm committed to continuously enhancing my skills and knowledge in the field. My goal is to keep pushing my boundaries and learning to become a better developer."

About me

I completed my degree in 2016, and in the same year, I got married. Shortly after, I embarked on a career in the microfinance sector, where I held the position of Branch Executive for four years, gaining valuable experience. Unfortunately, I had to resign from my job due to health issues during my pregnancy. However, I decided to pivot my career into the IT field.

Mini projects

- clone website   -https://github.com/soosan94sm/spacex
- clone website   -https://github.com/soosan94sm/lexi
- Potfololio   -https://github.com/soosan94sm/soosan-potfoloio
- responsive website   -https://github.com/soosan94sm/netflix

Projects

Ansa Ecommerce store
